

the body is shaped to define a recess within which the pivotable sole plate may sit when in at least one of the plurality of positions.

10. (New) A power saw according to claim 9, wherein the body of the power saw defines two working surfaces either of which may, during use of the power saw, abut a workpiece, and wherein the pivotable sole plate may be pivoted to rest against either of these two surfaces.

11. (New) A power saw according to claim 9, wherein the pivotable sole plate is lockable in any one of the plurality of positions.

12. (New) A power saw according to claim 10, wherein the pivotable sole plate is lockable in any one of the plurality of positions.

Sub B
A
13. (New) A power saw including: a body and a motor housed within the body; the motor arranged to power a reciprocable shaft on which a blade for sawing may be mounted; a pivotable sole plate attached to the body and arranged to be held relative thereto in a plurality of positions such that in at least one position the sole plate is in contact with a workpiece acting as a guide for use of the power saw as a jigsaw with the blade for sawing passing through the sole plate in use of the power saw as a jigsaw, and in a second position the sole plate is out of contact with the workpiece with the saw in a use position.

14. (New) A power saw according to claim 13, wherein the body of the power saw defines two working surfaces either of which may, during use of the power saw, abut a workpiece, and wherein the pivotable sole plate may be pivoted to rest against either of these two surfaces.

15. (New) A power saw according to claim 13, wherein the pivotable sole plate is lockable in any one of the plurality of positions.
